WORK EXPERIENCE

WP INFOTECH (December 2013 to may 2014) internship

Taken training for Android developer and developer android application for Final year college project.

Projects:**1. Call and SMS block android application**

→ Call and SMS block base on GPS, user can set different location with different contact to block, if user don't want call from girlfriend when he/she at home so he/she can set home location and add girlfriend number with many more setting available there silent profile, auto SMS reply etc.

2. Call and SMS backup PHP Website

→ User can get backup for all android phone contact and SMS on website with android application.

DIGNIZANT TECHNOLOGIES (August 2014 to present)

I joined as Jr. android developer I worked hard with my knowledge and now Project lead of mobile development team for various Android projects. Collaborate with UI designers, iOS developers, PHP developers and clients to develop applications.

Android Applications:**1. LOCALT**

→ LocalT provide a platform for traveller and tours activities to connect each other and provide services.

2. VINO MOMENTO

→ Vino Momento helps build you wine moments and your wine taste profile which you can easily share with your friends.

→ URL:- <https://play.google.com/store/apps/details?id=com.VinoMomento>

3. FOODIGGER

→ Foodigger - The unique and most convenient Haiti food control mobile application, featuring:

- The best restaurants - The richest variety of cuisine - The fastest food delivery service - And world-class customer service

4. FITBOOKERS

→ Fitbookers is an app that lets you easily buy gym passes when you're traveling, contract-free. Find nearby gyms at your current location, pay and immediately begin with your workout. The app users buy the passes from partner gyms for a little.

5. SNAPPYDATE

→ It is online dating app where you can fix any restaurant to meet and track each other location and enjoy the date.

→ URL:- <https://play.google.com/store/apps/details?id=com.ons.snapper>

6. DROIDFARM

→ It is complete platform for managing tasks at farm, add vehicles, add tools, and track by GPS on web and android app.

→ this is very big project still in development.

7. EASYJOB

→ EasyJob is a on-demand platform to connect corporate and job seekers on same way like Tinder does. Offer or look for works in the simplest way that exists. Wherever you are, few taps to be in the workforce.

Note:- this are few applications from my work history there is many more that I developed

Wear Application:-

1. Showfit HR Zones

→ The unique feature with Showfit HR Zones application for Andriod Wear watches is that you can use it along with our desktop Showfit Class Creator – SCC in a group class session. You can also use it for individual workout session at home, at the gym studio or outdoor. Our desktop SCC is used to workout presentation through a group class session on a wall screen(s) inside the exercise studio with the same vertical intensity profile as you see on the watch. You can use our watch application for Motorola 2, Motorola Sport, Polar M600, the very best part of the application is that you always can see in real time how much time you have spent in each zone and percent of total duration time during the workout combined with growing time accumulated color zone bars. Then you get an even better intensity control during the workout and can compare it with the group class instructor intensity zone profile on the wall screen through the session.
